# THE POWER'S IN YOUR HANDS.

**SUNPOWER RESERVE ENERGY STORAGE SYSTEM WITH SUNPOWER ONE**

## SunPower Reserve

All-in-one home energy management system with 5kW Hybrid-Inverter and 10kWh battery, expandable up to 60kWh

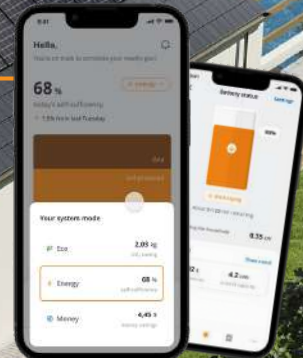

### Access clean energy, anytime.

Storing solar energy in a sustainable, cobalt-free battery chemistry ensures your customers have access to clean energy whenever they need it most.

### No grid, no problem.

Critical energy needs can be protected from grid outages through integrated blackout protection and stand-down support functions.

**SUNPOWER ONE**  
MAKING ENERGY SAVING EASY.

**It's not another monitoring app. SunPower One is an ecosystem designed to help homeowners easily understand their impact on the planet and their wallets.**

The system identifies how much energy a home generates and uses in real-time to expose devious power-hungry appliances – yes, any electric device, not just their SunPower ones. The app then delivers simple but effective insights homeowners can act on based on the way they personally use energy.
